Research Experience

National Institutes of Mental Health

CLINICAL BIostatistician

Bethesda, MD

Sep. 2023 - Present

I lead the design and analysis of human behavioral research in the Unit on the Neural Computations in Learning (PI: Angela Langdon).

Princeton University

PHD IN NEUROSCIENCE

Princeton, NJ

Sep. 2017 - Aug. 2023

I studied the factor structure of individual differences in reinforcement learning behaviors. I developed a battery of gamified and reliable reinforcement learning tasks, which was completed by 1,000+ adult participants. I used cognitive structural equation modeling to summarize the covariation in behaviors within- and across-tasks, and their relations to psychiatric symptoms.

Massachusetts General Hospital / Harvard Medical School

CLINICAL RESEARCH COORDINATOR

Boston, MA

Jun. 2014 - Jun. 2017

I was the lead analyst on three neuroimaging studies of cognitive control and approach-avoidance conflict in healthy and clinical populations. Analyses involved hierarchical Bayesian modeling, permutation-based fMRI analysis, and nonparametric EEG time series regression.
